

Dräger X-am 5000

The smallest gas detection instrument for up to 5 gases. The Dräger X-am 5000 belongs to a new generation of gas detectors, developed especially for personal monitoring applications. This 1 to 5-gas detector reliably measures combustible gases and vapours as well as oxygen and harmful concentrations of CO, H₂S, CO₂, Cl₂, HCN, NH₃, NO₂, PH₃ and SO₂. A variety of special calibrations for the catalytic Ex sensor allow even more sensitivity when detecting specific combustible gases and vapours. Equipped with durable XXS sensor technology, the Dräger X-am 5000 offers maximum security and extremely low operational costs.

Dräger X-am 5000:
the smallest gas detection instrument for 5 gases.

Ergonomic mobile phone design

Despite its advanced functionality, the Dräger X-am 5000's practical, mobile phone design and light weight make it comfortable for users to carry. Reduced to its essentials, the two button control panel and easy to follow menu system allow for intuitive use.

Durable electrochemical sensor technology

The longevity of the catalytic sensor and five year expected lifetime of the oxygen sensor are unique in the market. The Dräger X-am 5000 is equipped with the latest in the miniaturised XXS generation of high performance electrochemical DrägerSensors.

Flexible and adaptable sensor exchange

It is easy to exchange, upgrade or calibrate the sensors to other gases. The ability to customise the Dräger X-am 5000's sensors makes more applications possible, including rental equipment.

Innovate Ex sensor with full range functionality

The catalytic Ex sensor measures 0-100 % LEL and 0-100 Vol.-% methane concentration. The calibration concept simplifies a calibration to vapours. When set for maximum sensitivity, the detector is even more reliable to warn about unknown hazards.

Robust and water-tight

The Dräger X-am 5000 is tough: water and dust-resistant according to IP 67, the detector remains fully functional even after falling into water. The integrated rubber protection and shock-proof sensors ensure additional resistance to impact and vibration. Moreover, the Dräger X-am 5000 is insensitive to electromagnetic interference.

External pump

The optional external pump, which operates with a flexible hose up to 20 M long, makes it possible to use the detector for pre-entry measurements for tanks, shafts, etc. The pump starts automatically when the detector is inserted.

Optimum solutions for function (bump) tests and calibrations

Simple, fast and professional: from a function (bump) test to complete documentation, users can choose from a range of practical, on-site solutions that offer maximum safety for every application. The Dräger E-Cal automatic test and calibration station and the Dräger Bump Test Station are ideal system extensions that save time and reduce workload.

Calibration options

Fresh air, mixed gas and single gas calibrations can be done directly using the Dräger X-am 5000 menu.

Flexible power supply

The Dräger X-am 5000 can be used with either the standard alkaline or rechargeable NIMH batteries. In addition, it can be fitted with a T4 battery that can be charged while still inside the instrument.

Secure gas entry:

Gas entry from top and front.

Visual alarm:

180° alarm.

DrägerSensors:

Fast, accurate and durable.

Reflective faceplate:

Easy to find in the dark or in water.

Large display:

All readings at a glance.
